# ECLIPSE® PAYMENT TERMINAL

## A Brilliant Creation from TeleCheck

TeleCheck, a pioneer in the check acceptance industry, is again leading the way with a sleek, new payment terminal that is the perfect alignment of form and functionality. The Eclipse® payment terminal's multi-payment capability, integrated inkjet printer and check reader are sure to exceed anything you've encountered in the past.

## The Eclipse Can Do It All

The Eclipse payment terminal combines the benefits of the industry's largest and most accurate data bases with the most advanced authorization and payment technology. Here are just a few of its many features and benefits:

### Supports All Non-cash Payment Options

Transforms a multi-payment option nightmare into a merchant's dream by eliminating the need for different terminals to authorize and process checks, credit and debit cards, and EBT transactions. Eclipse also supports the TeleCheck Electronic Check Acceptance® (ECA®) service, the innovative process that converts paper checks into electronic items at the point of sale.

### Simple Touch-Screen Display

Touch-screen interface makes the Eclipse our most user-friendly terminal ever. A light tap is all it takes to follow the intuitive prompts as they guide you quickly through each transaction. Plus, the large, back-lit display ensures excellent visibility, even in low-light work areas.

### Advanced Check Reader

Scans the check information twice – reducing MICR read errors and converting paper checks into electronic items more accurately.

### Integrated Inkjet Printer

Checks for ECA transactions are voided and paper checks are franked complete with your subscriber number and approval code, saves counter space and reduces cables and cords

### Dual-Track Magnetic Reader

Automatically collects and inputs data from credit cards and driver's licenses with magnetic strips, speeding up check-out time and reducing procedural errors.

### Complete Check Imaging

Adds another layer of security and efficiency at the point of sale by allowing merchants to accept most checks without identification.

### Full Reporting Capability

Features full reporting capabilities for all payment types and easy access to all payment information– including both totals and details. It can store up to 500 check transactions and 300 card transactions.

### Provides the Power for ECA

Drives the TeleCheck Electronic Check Acceptance® (ECA®) service, allowing TeleCheck to deliver funds directly to your bank account, cutting paperwork and improving cash flow.

## TeleCheck. The Check Experts℠

It's easy to see why the Eclipse terminal outshines all other point-of-sale solutions available today.

For more information on how you can combine the benefits of the industry's largest, most accurate databases with the most advanced authorization and payment technology, contact your sales representative today at 1-866-640-4961.

## your single source for all payments

The only terminal you'll need, TeleCheck's Eclipseä terminal combines credit, debit and check processing into a sleek, compact solution—eliminating the need for anything else. Streamline your business operations with the one terminal that can process all your non-cash payments electronically. And with a touch-screen user interface, built-in printer and full reporting capabilities, the Eclipse terminal is the perfect choice for you.

## providing the solution for:

- **speed** - Instantly authorizes credit card, debit card, stored value card and check card transactions.
- **control** - Stores up to 300 credit/debit card transactions and up to 500 check transactions, reducing closing frequency.
- **flexibility** - Supports all payment options, including credit and debit cards and checks.
- **ease** - The back-lit touch screen display is easy to use and provides excellent visibility even in low lighting.

- **efficiency** - The state-of-the-art check reader converts paper checks into electronic items.
- **reporting** - Provides reporting for all payment information—credit, debit, stored value, checks—and includes both totals and detail reports.
- **convenience** - Dual-track magnetic stripe reader automatically collects and inputs data from credit cards and drivers' licenses, reducing errors and saving time.
- **training** - State-of-the-art check reader helps reduce clerk error.

## operational features:

- **check imaging** - Captures valuable information from the front of the check allowing you to process most checks without identification.
- **printing** - Integrated printer voids ECA® checks and franks non-ECA checks.

- **processor** - 32-bit, 24Mhz processor speeds up authorization and transaction time.
- **modem** - 14.4 modem results in faster downloads.
